EDA[**Exploratory Data Analysis]:[INSIGHTS]**

1️⃣ Age Distribution Chart :

Insight:

The majority of customers belong to the middle-age group (approximately 30–55 years), indicating that the company's primary customer base consists of working-age individuals with stable purchasing power.

2️⃣ Income Distribution Chart :

Insight:

Customer income levels are widely distributed, but most customers fall within the medium-to-high income range, suggesting strong potential for premium product marketing.

3️⃣ **Spending by Education Level (Boxplot)**

Insight:

Customers with higher education levels tend to show greater spending behavior, indicating a possible relationship between education level and purchasing capacity.

4️⃣ **Income vs Total Spending (Scatter Plot)** ⭐

Insight:

A positive relationship exists between income and total spending, showing that higher-income customers contribute significantly more to overall revenue.

5️⃣ **Purchases by Channel (Bar Chart)**

Insight:

Store purchases dominate over web and catalog purchases, suggesting customers prefer physical shopping experiences compared to online channels.

6️⃣ **Campaign Response Chart**

Insight:

A large proportion of customers did not respond to marketing campaigns, indicating an opportunity to improve campaign targeting and personalization strategies.

7️⃣ **Spending by Marital Status**

Insight:

Certain marital groups demonstrate higher spending levels, suggesting customer lifestyle and family structure influence purchasing behavior.
